Subject: Arkema Project Area - Groundwater Monitoring

---

Hi Madi,

We talked to the ERM team today and I have some of the details on the groundwater monitoring. The monitoring is planned to begin on March 1 and will likely last 4 to 5 weeks. The work will start with collection of water levels (probably one day of work) and then the sampling will be done starting with the cleanest wells. ERM is working on the sample order list and I should be able to get that to you tomorrow.

Two of the wells slated for dioxin and furan analysis are located on the GS Roofing property and we are working on an access agreement to sample them. I suspect these wells will be sampled toward the end of the event to allow time to complete the access agreement.

I'll provide more details tomorrow. Please let me know if you have any questions or concerns. Thanks!
